

Your solution for animal diagnostic, regulatory, research and other agricultural-related testing.

AgLabs is a comprehensive public sector support system for all administrative workflow in Animal, Plant, Consumer Protection, Chemistry and Food Safety laboratories. It's the re-modernization of USALIMS; with an upgraded web-based application framework, client reporting, and IT security components. It manages all data related to specimens, accessions, test results, etc. It provides automated client report generation, distribution, & auditing; advanced search options; stored comments and shortcuts; & client account and billing management functions.

AGLABS FEATURES

- Various QUICK-ENTRY OPTIONS allow for streamlined accessioning.
- Labs can design their own accession/specimen LABELS WITH BARCODES for use throughout the laboratory.
- Results can be entered within an individual accession, via MASS RESULTING TOOLS, or in batches with support for QC data.
- Follow-up tests can be ordered automatically or appear as options after initial tests are resulted.
- REPORTS of lab findings for clients are automatically generated, distributed, and maintained.
- WORKLIST, MASS REVIEW, AND ADVANCED SEARCH TOOLS allow for quick access to current work items and historical accession data.
- BUILT-IN INVOICING for laboratory fees and full client account management, including payments and finance charges.
- OVER 40 REPORTS are provided for historical, billing, and auditing purposes.
- Add inventory, SOP and QC improvements, API integration, party management.

ACCESSIONING

- Accession Form, Worklist, Quick Entry
- Receiving Quick Entry
- Coggins Quick Entry
- Accession Templates
- Accession Groups
- Sample Batch/Run with QCs
- Mass Test Ordering
- Mass Results by Test & Mass Review
- Instrument Result Import
- Automatic Follow-up Tests
- Calculated Results

MAINTENANCE

- Party and Test Maintenance
- Users/Groups/Permissions
- Reference Data
- Case Tracking
- Report Worklist
- Unverified Accessions

BILLING

- Individual Account Maintenance
- Monthly Billing Cycle
- Price Agreements
- Non-Accession Invoices
- Escrow Accounts
- Batch Payments
- Quotes and Estimates
- Finance Charges

MISCELLANEOUS

- QC Test Runs with Statistical Charts & Graphs
- Mass Correspondence – Email/Fax
- Document Import by barcode
- NAHLN Messaging
- GVL Messaging
- Advanced Accession Search
- Submitter Web Portal for remote accessioning and report retrieval
- Receiving Worklist
- Zero Dollar Invoiced Accessions

REPORTS

- Accessioning Activity
- Balances As Of Date
- Billing Charges and Adjustments
- Caseload/Turn-Around-Time Statistics
- Deposit Register
- Fee Schedules
- Gratis Testing Report
- Finance Charge Summary Report
- Past Due Notice
- Payment Receipt Report
- Receivables Aging Report
- Resulted Accessions
- Resulting Activity
- Specimen Submission by Accession
- Testing Summary
- Tests Performed by Discipline
- Tests Requested by Accession
- Tests by Analyst and by Section
- Turnaround Time by Sample Type

INTEGRATION

- The AgLabs Web Portal enables lab clients to submit test orders and retrieve results online.
- Integration with laboratory instruments sends test orders to instruments & imports results from instruments.
- Veterinarian data can be synchronized with the USAHERDS or AgEnterprise application and laboratory results can be messaged to NAHLN, Global Vet Link, and USAHERDS in standard HL7 format.

UNIFIED CODE BASE

- A unified code base allows enhancements and their costs to be shared by all customers.

USER GROUP MEETINGS

- Monthly user group meetings encourage collaboration between the laboratories and allow users to discuss best practices and additional features to be added to future releases.

TECHNOLOGY

- Web browser application.
- SQL Server database utilizing SQL Server Reporting Services and Report Builder for ad hoc reports.
- Mobile for internal and external.
